DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-10, 18, and 20-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Murphy #6,209,159. Murphy discloses a cushion 20 comprised of sealed envelope assembly 62, 80, 98, 128, 154, soft flexible top foam layer 180, denser closed cell foam reinforcing member 22 that is more than twice as thick as the outer layer, and waterproof flexible fabric outer layer 186 that surrounds and encloses the envelope assembly, top foam layer, and reinforcing member, as best seen in Figure 2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4, 5, and 12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brunner et al in view of Murphy as advanced above. Brunner et al disclose a tree stand 10 comprised of frame members 11, 14, 25, attachment member 58, and foam seat member 46. Brunner et al fail to disclose the seat cushion structure as claimed.

The seat cushion of Murphy as advanced above, provides a cushion having desirable levels of firmness that reduce pressure points on the body. Therefore, to one of ordinary skill in the art, it would have been obvious, as a matter of engineering design choice, to provide the tree stand of Brunner et al with a seat cushion as advanced by Murphy, so as to provides a cushion having desirable levels of firmness that reduce pressure points on the body.

Allowable Subject Matter

Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter is the inclusion of the envelope having a flexible foam therein. The prior art of record fails to teach or suggest the claimed feature absent the applicant's own disclosure.

Response to Arguments

Applicant's arguments, see pages 6-8 of the Amendment filed 8-05-04 with respect to the rejection(s) of claim(s) 1-5, 8, 10, 12-19 under Section 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the Murphy reference.
